### Hancock County Severe Wind Events 1/1950 - 7/2009

Total number of wind events: 74  
 Costliest wind event in database: \$50K  
 Total number of deaths from wind events: 0  
 Total number of injuries from wind events: 4

4/7/2003 – Strong winds and hail were common across the Northern Gulf coast as a squall line associated with a late season cold front moved into the area. Across the northern portion of Hancock County, straight-line winds knocked down trees and power lines, blew the roof off of a house and restaurant, damaged a garage and out buildings, and blew off the canopies of two service stations. The storms produced an estimated \$50K in damaged across Hancock County.

### Hancock County Tornadoes 1/1950 - 7/2009

### Hancock County Tornadoes 1/1950 - 7/2009

### Hancock County Tornadoes 1/1950 - 7/2009

5/19/1980 – A severe thunderstorm produced a tornado that initially touched down east of Pearllington, MS. The tornado proceeded to move northeast leaving a damage path that was 13 miles long and 800 yards wide at its widest point. The tornado injured 8 people and caused an estimated \$25 million in damage and was rated an F3 on the Fujita Scale. Luckily, there were no reported deaths associated with the tornado.

11/16/1987 – A tornado touched down about 7 miles northwest of Kiln and moved northeast through a sparsely inhabited portion of Hancock County. Along its 3 mile path, the tornado crossed MS highway 603, destroying a brick home and a barn. The tornado caused an estimated \$80 thousand in damage and was rated an F2 on the Fujita Scale.
